

## About me

My name is Viacheslav, I am 29, I am junior QA engineer. I'd describe myself as a goal-oriented and hardworking person with good organizational skills and strategic thinking. Also, I'm competitive and like to excel at everything I do. And last but not least, I'm very flexible and adaptable to new situations. Regardless of the situation I have the ability to adapt and work under any circumstances. At this moment I do not have enough work experience, but my active life position and purposefulness makes me the kind of person you want to get to know and cooperate in future.

I graduated from the Francisk Skorina Gomel State University with a degree in "world economist". For almost 2 years I worked in a bank as a specialist in providing retail banking services, for a year and a half I worked as a senior inspector in the Internal Affairs Department and at the moment I have been working as a manager at Yandex for more than 2 years

I decided to change my specialty when I saw my friend working as a tester. I was interested to try something unknown, my new job quickly took over, now I plan to develop in this direction.

When I work at every task, I learn something new, I am not afraid to ask for help and advice. It is important for me to complete the task quickly and effectively. It is important for me not only to gain experience, but also to take my place in a team where I can be useful, with which I can move into the future, contributing to the common deal.

## Education and courses

Francisk Skorina Gomel State University - world economy

Geekbrains - software testing

TestPro - planning and organizing the testing process, documentation, reporting of test results

Beonmax - C and Java
